## MAGNUM VEGA

### Vega Concept: innovation and design in aid of drivers

The Vega Concept is a mobile laboratory of “life-on-board” ideas for the driver. Comfort, technology and modularity of interior fittings for the most demanding drivers during their rest and relaxation periods, in an exclusive, harmonious environment of warm materials with a metallic theme and touches of blue lighting.

The inspiration for the outer design is inspired by the world of truck drivers who are passionate about personalising their bodywork: we have paid tribute to them by combining chrome, aluminium and lighting on dark paintwork with deep reflections; applied in a rigorous and structured way, these contrasts reinforce the Magnum's personality.
