RENAULT
TRUCKS
DELIVER

January 2018

RENAULT TRUCKS USED VEHICLES NOW ON LINE

Renault Trucks is launching an online platform listing used trucks available for sale in Europe. The next step will be a fully-fledged E-commerce store in 2020.

Renault Trucks customers can now log in to an online platform - www.used-renault-trucks.com – and consult the catalogue of used vehicles. Haulage companies can pick their future used truck based on criteria such as vehicle configuration, price or mileage. Each truck comes with its own data sheet and is geolocated with the contact details of the Renault Trucks outlet where it is for sale.

Road haulage companies can take their pick from a choice of recent used vehicles with the Renault Trucks “Selection” quality label. This means the trucks have the Renault Trucks expert seal of approval and are delivered with a package of bespoke trade solutions.

The new range of Renault Trucks X-Road used trucks is also available on line. These trucks are converted in the Renault Trucks Used Trucks Factory in Bourg-en-Bresse using state-of-the-art manufacturing techniques giving them a new lease of life as top-quality robust vehicles.

All the used trucks on the platform have been subjected to strict quality controls by accredited Renault Trucks experts and are fitted out according to manufacturer’s standards using original parts.

The trucks featured on the platform are on sale exclusively in Renault Trucks dealerships and all of them benefit from round-the-clock technical assistance and the professional expertise offered by our 1,500 sales outlets and services points worldwide.
