RENAULT TRUCKS T P-ROAD: TURNING A STANDARD TRACTOR INTO A MULTIPURPOSE CARRIER

Renault Trucks is expanding its range of used vehicles and bringing out a new model from the "Used Trucks Factory" incorporated into the Bourg-en-Bresse manufacturing site. The T P-Road is the result of converting Renault Trucks T Tractors into Carriers to meet customer demand.

Renault Trucks is bringing out a customized used carrier - the T P-Road - to meet the specific requirements of customers looking for high-quality, certified, used carriers. This new model (a Renault Trucks T X-Road worksite supply truck) is the latest addition to the manufacturer's existing "Used Trucks Factory" range of customized used vehicles.

In the Used Trucks Factory workshop at the Bourg-en-Bresse manufacturing site, rigorously-selected, recent, used tractors are first checked against a more than 200-point checklist before being converted in accordance with the truck builder's manufacturing standards.

Prior to any conversion, Renault Trucks design office and quality engineers carry out a specific study of each conversion project. The industrial manufacturing process and quality control meet the same demanding standards as those applied when manufacturing a new vehicle.

To carry out the conversion, the cab, drive chain and suspension are first removed so that the existing rails can be replaced by new rails with a customized wheelbase. This guarantees the vehicle's robustness and suitability for any type of body and purpose.

The T P-Road undergoes the same strict quality control and systematic road test as new vehicles before delivery to Renault Trucks dealerships.

The T P-Road is currently available in the 4x2 frame version, with a choice of three different wheelbase lengths (5600, 6000 and 6500 mm) as required. Vehicles can also be customized for driving schools and removal companies.

The T P-Road is guaranteed for one year or 120,000 km. This manufacturer's guarantee (Selection Label) covers all drive chain components (engine, gearbox and bridges) and applies to all Renault Trucks sales and service outlets in Europe.

Used Trucks by Renault Trucks

The Used Trucks by Renault Trucks label embraces all of the manufacturer's operations in the used-vehicle business.

Used Trucks by Renault Trucks is underpinned by three key assets: a commitment to quality and transparency in the selection and preparation of the vehicles; a range of tailored vehicles and services; a locally-based network to serve its customers.

About Renault Trucks

Building on the legacy of more than a century of French truck know-how, Renault Trucks supplies transport professionals with a wide range of services and vehicles (from 2.8 to 120 T) adapted to local and regional distribution, construction and long distance activities. Renault Trucks vehicles are sturdy and reliable with low fuel consumption that enables them to deliver greater productivity and control operating costs. Renault Trucks is distributing and servicing its trucks via a dealership network comprising over 1,500 service outlets. The design and assembly of Renault Trucks vehicles, as well as the production of most components, is carried out in France.

Renault Trucks is part of the Volvo Group, one of the world's leading manufacturers of trucks, buses, construction equipment and marine and industrial engines. The Group also provides complete solutions for financing and service. The Volvo Group, which employs about 95,000 people, has production facilities in 18 countries and sells its products in more than 190 markets. In 2017 the Volvo Group's net sales amounted to about SEK 335 billion (EUR 35 billion). The Volvo Group is a publicly-held company headquartered in Gothenburg, Sweden. Volvo shares are listed on Nasdaq Stockholm.
