

PRESS RELEASE

JULY 2018

T HIGH RENAULT SPORT RACING, THE NEW RENAULT TRUCKS LIMITED SERIES

Renault Trucks and Renault Sport Racing have combined their expertise to produce the T High Renault Sport Racing. This special series, featuring Sirius yellow paint – the iconic colour of the F1 Renault Sport Racing team – is being limited to 99 vehicles.

Renault Trucks has joined forces with Renault Sport Racing to design the T High Renault Sport Racing, the new limited edition of the flagship of its long distance range. This vehicle is being produced at the Bourg-en-Bresse plant and, like all other Renault Trucks, carries the Guaranteed Made in France certification.

This limited series, boasting an elegant, sporty look, features Sirius yellow paint, which is the iconic colour of Renault Sport Racing Formula One, together with the yellow and black check that forms the graphic identity of Renault Sport models.

Different textures and shades of black contrast with the yellow: the wing mirrors of the T High Renault Sport Racing have been given a coat of shiny black paint, as have the diamond and the radiator grill. To highlight the sporting design of the vehicle, the yellow and black check features again on the side deflectors. Last but not least, each vehicle of this limited series has a numbered black ID plate.

The cabin has also been specially designed, featuring top of the range equipment and yellow and black colours to match the exterior. The Recaro® seats and steering wheel are both covered in black leather with yellow stitching. The bunk and floor mat also have yellow stitching, whilst the panoramic dashboard has a carbon finish and ventilators are circled in yellow. And to complete the sporting look, the seat belt is fitted with a yellow sleeve.

The T High Renault Sport Racing combines on-board comfort, driving pleasure and performance. It has a completely flat floor and is fitted with a 13 L 520 hp engine and an Optidriver automated gearbox.

About Renault Trucks

Building on the legacy of more than a century of French truck know-how, Renault Trucks supplies transport professionals with a wide range of services and vehicles (from 2.8 to 120 T) adapted to local and regional distribution, construction and long distance activities. Renault Trucks vehicles are sturdy and reliable with low fuel consumption that enables them to deliver greater productivity and control operating costs. Renault Trucks is distributing and servicing its trucks via a dealership network comprising over 1,500 service outlets. The design and assembly of Renault Trucks vehicles, as well as the production of most components, is carried out in France.

Renault Trucks is part of the Volvo Group, one of the world's leading manufacturers of trucks, buses, construction equipment and marine and industrial engines. The Group also provides complete solutions for financing and service. The Volvo Group, which employs about 95,000 people, has production facilities in 18 countries and sells its products in more than 190 markets. In 2017 the Volvo Group's net sales amounted to about SEK 335 billion (EUR 35 billion). The Volvo Group is a publicly-held company headquartered in Gothenburg, Sweden. Volvo shares are listed on Nasdaq Stockholm.
