SVHC SAFE USE INFORMATION

REACH ARTICLE 33 INFORMATION CONCERNING SUBSTANCES OF VERY HIGH CONCERN

The REACH Regulation (Reg. EC 1907/2006) Article 33(1) is aimed at enabling customers of supplied products to take any relevant risk management measures that may arise from the presence in articles of Substances of Very High Concern (SVHCs) listed on the current Candidate List for

Authorisation, in order to guarantee their safe use.

Renault Trucks supports the underlying goals of REACH generally and Article 33(1) specifically, which are consistent with our own commitment to promote the responsible manufacturing, handling and use of our products.

Identification of REACH candidate substances

To the best of our knowledge based on information received from our supply chain and our own product data, the REACH candidate substances present greater than 0.1% w/w in component articles are those shown on the beneath "REACH candidate substances".

Specific Safe Use Information (SUI) for Articles Containing REACH candidate substances

If applicable, Specific Safe Use Information (SUI) for articles containing REACH candidate substances is added to the list "Specific Safe Use Information (SUI) for Articles Containing REACH candidate substances".

* REACH: Registration, Evaluation, Authorization and restriction of Chemical Substances

General Safe Use Information for Articles

Each Renault Truck vehicle is provided with an owner manual, which includes safe use information for owners/operators of the vehicle. Renault Trucks information on repair and servicing of vehicles and genuine parts also includes safe use information for service personnel.

Where present in parts of this vehicle, [except for Specific Safe Use Information beneath] the REACH candidate list substances are incorporated in such a way that potential exposure to the customers is minimised, and danger for humans or the environment can be excluded as long as the vehicle and its parts are used as intended, and any repairs, servicing and maintenance are carried out following technical instructions for those activities, and industry standard good practices.
