

ENVIRONMENTAL PRODUCT INFORMATION

- Environmental product information is drawn from life cycle analyses (LCAs) carried out on Renault Trucks vehicles. These cover all phases in a truck's life, from the production of raw materials right through to final dismantling and recycling. It provides data concerning the environmental impact of each one of these phases. The results reveal the most important environmental parameters in the product life cycle.
- These documents can be requested by telephone, e-mail at Info.environnement@renault-trucks.com or by letter to
Renault Trucks
Environmental Management Department
TER A60 2 06, 99, route de Lyon 69806 Saint-Priest – France.
