

# REACH

Renault Trucks follows and supports REACH – an EU regulation aimed at minimizing the risks in the presence of Substances of Very High Concern. REACH requires that all suppliers register, evaluate, gain approval and also limit the use of harmful chemicals in their products. Not only are we a manufacturer of trucks, but also a supplier of spare parts for repair and service – all of which are delivered in protective packaging. REACH forms an important part of our ongoing commitment to responsible manufacturing, handling and use of our products.
